

Environmental Policy

Power Protect Pty Ltd provide installation and maintenance services to Uninterrupted Power Supplies, Generators, Power Factor Correction, Harmonic Filters and Lightning Protection. To assist in meeting legal and industry expectations we have developed and implemented Safety, Quality and Environmental Management Systems.

Our Environmental Management System provides a risk based approach aligned with ISO 14001:2015 Environmental Management Systems and Environmental Acts, Regulations, Policies and Guidance. The system has been structured to identify and manage our external and internal risks, and the needs and expectations of our workers, our clients, the public and other interested parties.

The Executive Management Team have identified objectives for the business and allocated targets to reflect performance. Performance data is collected and reported to the Executive Management Team for action and comment. The direct involvement of Executive Management ensures a robust ongoing review of our performance to ensure continuing improvement and compliance awareness. We are committed to reducing risk in the workplace to as low as reasonably practical.

Environmental Objectives

1. To control all pollution (solids, gases, liquids) and not breach legal or other requirements with the aim to record zero EPA infringements or notices;
2. Hazard Identification, Risk Assessment and Control applied to our activities that impact on the environment with the aim of mitigating environmental risk to as low as reasonably practical;
3. All Non-Conformance Reports to be actioned and closed out within the specified timeframe;
4. Recycling of battery, metal and chemical waste to be verified during monitoring processes;
5. Recycling focus on the management and disposal of lead to approved recycling services;
6. Communication and consultation forums to be completed as per system requirements to ensure opportunity is provided to interested parties to contribute to the management of risks;
7. Achieving and maintaining second party certification with the ACT Government; and
8. Review of the Management System every 12 months.

This policy is reviewed annually and any changes communicated to employees. This Environmental Policy is authorised for use and publication by the authorising Managing Director, Jason Marriott.

Effective 17 June 2019

Jason Marriott
Managing Director
